

SRB Summer STEAM Class

***NEW - Bonus Session Added - check it out!**

This summer, SRB is having it's Summer STEAM & Fun Class. Your children will explore science, technology, engineering, art, and math through fun and highly educational hands-on activities. In addition, they will also rotate daily through organized sports and craft activities.

We have a new additional class you can add on, called *Edible STEM*. Students will test their taste buds, using chemistry & math, creating yummy recipes. Recipes will include, making their own boba, rock candy, etc. Students will walk away with their own recipe book at the end of the week.

The other two sessions being offered, will each focus on different topics and activities, using STEAM. You may choose to participate in one session or all. Space is limited, so early registration is recommended.

Registration Deadline is May 20th. Send in one registration form per student along with payment.

See more details below. Any questions, contact Mrs. Schroeder at dschroeder@srb-chicago.org or Mrs. Levin at rlevin@srb-chicago.org.

WHO

all incoming SRB K-8th grade students welcome
